

February 13, 2006

My name is Danny Shipp; I have been an automotive technician for 26 years and am currently **ASE Certified at the Master Level**. I want to introduce you to a revolutionary product that is going to enable us to make an impact in the effort to reduce this country's dependency on foreign oil.

Recently, in the State of the Union Address, our own President Bush discussed how this country is too dependent on foreign oil supplies and how we need to develop a means to reduce this dependency. Well, listen up! There is a cutting edge product available that will allow us to impact our economy and our dependency on foreign oil like nothing this country has ever seen.

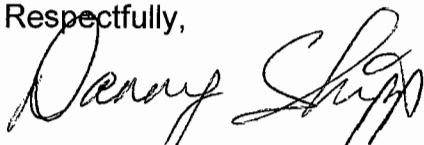

That product is **Bio-Performance Fuel**. Bio-Performance Fuel will have no negative impact on or cause internal damage to our vehicles. This product is merely a catalyst that lowers the flashpoint of our fuel. This product allows for easier ignition of the fuel. It will in turn, because of the dispersant quality, enable to fuel to burn more efficiently. This will provide a more complete combustion cycle, resulting in fewer emissions expelled from our exhaust systems. Ultimately, it will take less fuel to create the horsepower necessary to operate our engines. It only makes sense that our vehicles will use less fuel and create a better environment to be passed on to future generations.

In my professional 26-year automotive opinion, this product can only be beneficial for use in our vehicles and equipment. It raises both detergent and lubrication qualities of our fuel to further assist in preventing fuel system failures. I am also comforted by the fact that Bio-Performance Inc. guarantees the use of Bio-Performance Fuel to be safe to use in any internal combustion engine.

I am extremely thankful that I was introduced to this product. And now, having personally experienced the money-saving results promised by this product, I am also excited about the opportunity to share it with others along with a marketing plan that will allow you to create a residual income with your own distributorship.

If you can understand the potential for savings across the country you should feel very comfortable sharing this universally welcomed product with anyone you see.

Respectfully,

Danny Shipp  
ASE Certified Master Auto Technician and  
Bio-Performance Fuel Distributor
